Curriculum Vitae

Research Interests

Plant ecophysiology; Heat and drought responses of plants; Non-foliar water loss; Bark water vapor conductance; Hydraulic limits of woody plants; Dendrochronology.

Education

- | | |
|----------------------|---|
| May 2022 – Present | Ph.D. Candidate, Louisiana State University
Baton Rouge, Louisiana, US
Major Professor: Dr. Brett Wolfe
Receiver of Gilbert Research Assistantship
GPA: 4.038 |
| Aug 2019 – May 2021 | M.F., University of New Brunswick
Fredericton, New Brunswick, Canada
Thesis Topic: <i>Sudden Fir Mortality in New Brunswick, Canada: History and Dendrochronological Analysis</i> |
| Aug 2018 – July 2019 | B.S., University of New Brunswick, Forestry (visiting student)
Fredericton, New Brunswick, Canada
Honors Thesis Topic: History of Sudden Fir Mortality in balsam fir in Canada |
| Aug 2015 – July 2019 | B.A.G., Nanjing Forestry University, Forestry
Nanjing, Jiangsu, China |

Professional Experience and Organization

- | | |
|----------------|---|
| 2023 – Present | Member of Xi Sigma Pi National Forestry Honor Society |
| 2019 – 2021 | Graduate Research Assistant , Forest Health Lab, University of New Brunswick <ul style="list-style-type: none"> ○ Collected field data to quantify the mortality of balsam fir trees in NB ○ Collected tree cores (appx. 100 cores) from asymptomatic and symptomatic balsam firs ○ Mounted, prepared, scanned, measured, and analyzed trees cores ○ Assisted other lab technicians in learning the scanning and measurement protocols |
| 2019 – 2020 | Lab Technician , Forest Health Lab, University of New Brunswick <ul style="list-style-type: none"> ○ Team member of the "Grand Lake Meadow's Tree Response to Flood Events" project ○ Processed >200 hardwood tree cores (measured, edited, cross-dated cores) ○ Assisted with analysis of tree-level response to historical and current flood events |

Awards and Honors

- | | |
|-------------|---|
| 2025 | Clark M. Hoffpauer Memorial Fund Scholarship , Louisiana State University |
| 2024 | Barbara S. Edisen Memorial Graduate Scholarship , Louisiana State University |
| 2018 – 2020 | International Differential Award , University of New Brunswick |

2019

Edwin Jacob Special University Scholarship, University of New Brunswick

2018 – 2019

Dean's List for Academic Excellence, University of New Brunswick

2015 – 2019

Excellent Student Award Scholarship, Nanjing Forestry University

Publications

Zhou, Y., Wolfe, B. 2026. Bark water vapor conductance of temperate forest trees declines under warmer, drier air. *Plant, Cell & Environment* (submitted)

Zhou, Y., Rosseau, G., Dao, V., Wolfe, B. 2024. Bark water vapor conductance varies among temperate forest tree species and is affected by flooding and stem bending. *Tree Physiology*

Presentations and Guest Lectures

Zhou, Y., Wolfe, B.T. Hyperspectral reflectance predicts leaf water content and bark structure better than residual conductance. Botany 2026, Tucson, Arizona, 03 Aug 2026. [poster presented]

Zhou, Y., Wolfe, B.T. Bark transpiration: Environmental drivers, structural mechanisms, and implications for tree resilience in a changing climate. Botany 2026, Tucson, Arizona, 03 Aug 2026. [invited]

Zhou, Y., Wolfe, B.T. Increasing air temperature reduces bark water vapor conductance. -Too hot to leak? North American Forest Ecology Workshop, Missoula, Montana, 24 Jun 2026.

Zhou, Y. Guest Lecture: An introduction to dendrochronology: The dating and study of annual growth rings in trees. RNR 3105, Louisiana State University, 04 Dec 2025. [invited]

Zhou, Y. Guest Lecture: An introduction to dendrochronology. RNR 3105, Louisiana State University, 01 May 2025. [invited]

Zhou, Y., Rosseau, G., Wolfe, B. Bark water vapor conductance varies among temperate forest tree species and is affected by flooding and stem bending. 2023 LSU/Southern Ag Centers Joint Annual Conference, 14 Dec 2023. [poster presented]

Zhou, Y., Rosseau, G., Wolfe, B. Bark water vapor conductance varies among temperate forest tree species and is affected by flooding and stem bending. 2023 Annual Meeting & Research Symposium of the Louisiana Association of Professional Biologists, 5 Oct 2023.

Zhou, Y., Rosseau, G., Wolfe, B. Bark water vapor conductance varies among temperate forest tree species and is affected by flooding and stem bending. LAWater 2023: 14th Annual Louisiana Water Conference, 3 Aug 2023.

Zhou, Y., Broom, J., Costanza, K.K.L. Sudden Fir Mortality in New Brunswick, Canada: History and dendrochronological analysis. American Phytopathological Society (APS) Plant Health 2020 Annual Conference, Online, 6 Aug 2020. [poster presented]

Zhou, Y. History of Sudden Fir Mortality in Balsam Fir in Canada. Honors Student Research Symposium, Fredericton, NB, 12 Apr 2019.

Leadership

Aug 2025 – Present

Vice President, Table Tennis Club, Louisiana State University

Languages

- Native in Mandarin. Fluent in English, both written and verbal.
